YOUR NAME

Full-stack & DevOps Engineer

you@example.com · github.com/your-username · Remote, UTC+1

PROFILE

Freelance software engineer working where product meets infrastructure. Eight years of building production systems in TypeScript, Go and Kubernetes — from the first schema to the last deploy. Usually one engagement at a time, three to six months long.

SELECTED EXPERIENCE

Freelance Software Engineer & Consultant
Independent · 2023 – Present

Product engineering, platform work and reliability audits for teams between seed stage and series B. Shipped 11 client projects; 9 still run without me.

Senior Platform Engineer
Northwind Systems · 2020 – 2023

Owned the deployment platform for 40 engineers. Migrated 60 services to EKS with no customer-visible downtime; cut mean deploy time from 24 minutes to 4.

Full-stack Developer
Bitfold · 2017 – 2020

Second engineer on a B2B analytics product. Scaled event ingest from 200 to 40k events/s and introduced the first real CI pipeline.

SKILLS

Languages	TypeScript, Go, Python, SQL, Bash
Platform	Kubernetes, Docker, Terraform, GitHub Actions, Argo CD
Cloud	AWS, Cloudflare, Fly.io, PostgreSQL, Redis, ClickHouse
Practice	Observability, SLOs, WCAG 2.2, performance audits
